IN THE CLAIMS

Please cancel Claims 1-53.

Please add the following claims.

--54. (New) A test kit for visualizing skin lines and skin wrinkles, comprising:

- (i) a transparent substrate having an adhesive surface, wherein the adhesive is capable of making an image of skin lines and wrinkles after removal of the substrate from the skin;
- (ii) a visualizing substrate having a darkened area which is capable of receiving the substrate after removal from the skin; and
- (iii) a plurality of reference images adapted to provide a comparison with the image formed on the adhesive surface of the substrate.

55. (New) The kit of claim 54, wherein the adhesive surface responds to contact with the skin.

56. (New) The kit of claim 54, wherein the adhesive is a solid.

57. (New) The kit of claim 54, which wherein reference images correspond to various degrees of aging of the skin.

58. (New) A method for evaluating the efficacy of a skin treatment product, comprising:

applying a first transparent substrate having an adhesive surface to the skin, wherein the adhesive makes an image of skin lines and wrinkles after removal of the first transparent substrate from the skin;

removing the transparent substrate from the skin and placing the transparent substrate on a visualizing substrate having a darkened area;

applying a skin treatment product to the skin;
applying a second transparent substrate having an adhesive surface to the skin,
wherein the adhesive makes an image of skin lines and wrinkles after removal of the second
transparent substrate from the skin;
removing the transparent substrate from the skin and placing the second transparent
substrate on a visualizing substrate having a darkened area; and
comparing the image from the first transparent substrate and the image from the
second transparent substrate.

59. (New) The method of claim 58, further comprising treating the skin with a
cosmetic product prior to applying the first transparent substrate.

60. (New) The method of claim 58, wherein the skin treatment product is an anti-
wrinkle agent.

61. (New) The method of claim 58, wherein the adhesive is a solid.

62. (New) The method of claim 58, wherein the substrates and the skin treatment
product are packaged as a kit.

63. (New) The method of claim 62, wherein the kit further comprises reference
images which correspond to various degrees of aging of the skin.

64. (New) The method of claim 58, wherein the substrates are applied to at least one
area selected from the crow's foot region, the forehead, and the corner of the mouth.--

SUPPORT FOR THE AMENDMENTS

The specification has been amended to insert continuing application data. Newly
added Claims 54-64 are supported by the specification at pages 2-12 and by original Claims
1-53. No new matter is believed to have been added to this application by these amendments.
